

## Safety Features

**FMVSS 118 Anti Trap System:** The sunroof is equipped with an automatic reversal system, in accordance with Federal Motor Vehicle Safety Standards. This feature automatically stops and reverses glass movement when it contacts an obstruction.

**Wind Buffeting:** In certain driving conditions, your vehicle may encounter wind buffeting when the glass panel is in the open position. This is due to unequal air pressure between the exterior and interior of your vehicle. To eliminate this condition, you have the option of opening your window or reprogramming your Sunroof's stop position.

**When to Notify a Service Center:** Your Sunroof requires little maintenance and contains no consumer serviceable parts. Do not attempt to fix it yourself. If you have operation questions or your Sunroof needs service due to operation malfunction, contact an Authorized Dealer near you or visit our website at [www.signature-autoproducts.us](http://www.signature-autoproducts.us)

## Signature Series Lifetime Warranty:

Signature Automotive Products warrants the quality and functioning of the Sunroof, excluding glass breakage. Signature Automotive Products' lifetime warranty is to the original purchaser and covers sunroof parts only.

The warranty applies only if the Sunroof has been installed by an Authorized Dealer in accordance with Signature Automotive Products' installation instructions and does not cover installation or other work performed by the installer. This warranty does not apply to any Sunroof that has been subject to misuse, abuse, negligence, flood, fire, or an accident nor does it cover inconvenience loss of time and loss of vehicle use.

All warranty service is to receive prior authorization from Signature Automotive Products through an Authorized Dealer. Warranty work will only be performed by an Authorized Dealer and is valid only if proof of purchase is presented. Labor and shipping costs for replacement parts will be the responsibility of the customer. This warranty is valid in the United States and Canada only. Signature Automotive Products' agents, employees, representatives or installers are not authorized to change this warranty in any way or grant any other warranty on behalf of Signature Automotive Products.

To **Vent** from the close position, press once or hold the top button.

To **Close** the glass panel from any position, press once or hold the top button.

The **sunshade** can be opened and closed manually when the glass is in the close or vent position.

Congratulations and thank you for your recent purchase of Signature Automotive Products *Signature Series* inbuilt sunroof.

Your Sunroof is an electrically operated sliding and venting glass panel that allows you to enjoy fresh air and sunshine. The Sunroof is operated by a two or three button illuminated switch either located in the overhead console or dash area. Your vehicle ignition must be in the ON or ACCESSORY position for the sunroof to operate.

The Sunroof can be operated in the following two modes: *Continuous* and *One Touch*<sup>TM</sup>.

*Continuous* mode allows the Sunroof to be operated in either direction by holding down the operating switch.

*One Touch*<sup>TM</sup> mode allows the Sunroof to be operated without holding the operating switch down but by simply tapping it and can be cancelled by any switch activation.

*Auto Close* function allows the sunroof to close automatically when switching off the vehicle ignition. During the Auto Close function, simply press the switch to cancel, this will return the glass panel to the position it was in prior to the start of the Auto Close function. Pressing the switch again will reactivate the Auto Close.

**Initialization of Glass Panel:** all factory settings can be re-set as follows:

1. Place the glass panel into full vented position.
2. Once the Glass has reached the full vent position, release and hold the vent button. The glass will kick back after 5 seconds indicating re-initialization has been completed.
3. Cycle the glass to ensure proper function.

**Maintenance:** To ensure trouble free operation, Signature Automotive Products recommends you inspect the sunroof frequently for dirt or debris and clean when necessary. If the sunroof is exposed to a dusty or sandy environment, it should be cleaned and lubricated more often. Use mild detergent and water to clean the glass seal.
